## GRAND CANYON GATEWAY.

Flagstaff Will Be the Starting Point from the Atlantic &amp; Pacific.

As stated in last week's SUN, that arrangement would be made for the establishing of a stage line to the Grand Canyon and the building of suitable hotel accommodations on the road and at the canyon, the final arrangements were made on last Friday night between Superintendent Gabel and the Flagstaff Board of Trade, and work of preparation is now going on, and next week the stage line and the hotel will be in operation. A stage office is being erected just west of the depot, and the tourist travel over the Santa Fe system will be turned over to the stage company at this point. E. S. Wilcox will have charge of the stage line, and tourists, if they desire, can now make the trip to the canyon in a day. Stages for the present will leave Flagstaff on Mondays, Wednesdays and Fridays. A hotel company, known as the Grand Canyon Hotel Company, has been incorporated for the purpose of building and carrying on the necessary eating houses on the route to the canyon. The officers of the company are: Dr. D. J. Brannen, president; J. H. Hoskins, Jr., treasurer; H. D. Ross, secretary; Geo. Babbitt, T. A. Riordan, and P. J. Brannen, directors.

The management of the hotels has been let by contract to I. Chrisman, who will at once assume charge. The successful management of the stage line and the satisfactory management of the hotel is what the directors of the company will have to look after carefully, as on the direction of these depend largely the number of tourists who will visit the canyon from this point.

## A FRAUD.

Prof. Downie's Farceful Operations in Albuquerque.

Prof. Downie lectured in Albuquerque, and the Citizen has the following to say about him:

"Were it not for the serious fact that they are several dollars out of pocket, we should consider it a pretty good joke on the ladies of the library association to be taken in by a common magic lantern show, but they can congratulate themselves on the fact that while they are a little poorer in cash they are a good deal richer in experience, and the next monthbank who comes along will not be able to take them in so easily nor for so much. The library people had no means of knowing that the fellow who performed for them last week was a fraud, but any tolerably fair judge of human nature ought to know that any man resembling the pictures which this chap displayed around town, could not in the nature of things, amount to much, yet it must be admitted that the pictures flattered the man. He is a very small pattern of a hump, but he was smart enough to get a good price for his show, which, as we have said, was merely an ordinary magic lantern exhibition, and the accompanying descriptive lecture was very poorly recited. Not only that, but he quarreled for about an hour with some of the library people about terms, on Friday evening, and did not begin his show till nine o'clock, and then took occasion several times during his speech to refer in a very insulting manner to those with whom he had differed. For this part of the performance he deserved to be taken out after the audience left and treated to a good horse-whipping, for it is enough that people should be swindled without being insulted afterward."

## "A Yard of Pansies."

Now is your chance! "A yard of Pansies," an exquisite oil picture, a companion to "A Yard of Roses," which has been so universally admired, is given free of cost, as a souvenir with every copy of DEMOREST'S FAMILY MAGAZINE for June. "A Yard of Pansies" was painted by the same noted artist, V. Janus, who painted the "Roses," but competent art critics pronounce the "Pansies" to be superior to the "Roses." "A Yard of Pansies" was painted to order at a cost of \$300, and the reproduction, which is given with each Magazine, is in every respect equal to the original. And this is only one of the many notable features that make the June number the best one ever issued. The first article, "Mammoth Cave by Flashlight," is the finest one ever published on the subject, and is illustrated by over a score of superb pictures, pictures of places that have never before been photographed, so that one may become familiar with the wonders and beauties of this marvelous place without incurring the fatigue and expense of a personal visit. "The Queen of Flowers" is a charming article about the rose, with illustrations of all the fashionable varieties, actual size. "A Panoramic View of Existing Religions," by Rev. Carlos Martyn, will interest everybody, and explain many points of likeness and difference between the religious beliefs of the present day. Sergeant Dunn of the U. S. Weather Bureau at New York has a splendid illustrated article, "How the Weather is Forecast." All who have dabbled in photography will enjoy the humor of "A Successful Failure" and the accompanying pictures. Then there are excellent stories, every department is overflowing with good things, and there are about 250 illustrations, including a full-page portrait of the publisher. And this June number costs only the usual price, 20 cents. The subscription price is \$2 a year. Published by W. JENNINGS DEMOREST, 15 East 14th St., New York.

## The Atlantic &amp; Pacific Railroad

Employees' Co-operative Company has filed its articles of incorporation with the Recorder. The object of the association is the building of houses, cottages and other buildings along the line of the Atlantic & Pacific railroad for the purpose of renting and selling the same to the employees of the company. The capital stock is \$100,000, divided into 1,000 shares of \$100 each. The incorporators are: T. R. Gabel, C. N. Sterry, W. W. Pope, and C. E. Cray. The stock has been taken by the employees of the company, and it is a good investment for them, as, instead of renting houses, as is the case with the majority of them at present, in a few years they will own their own homes.

## The Favored Classes.

Teachers, ministers, farmers, mechanics, merchants, as well as their wives, daughters and sons, who would like to devote at least a part of their time and attention to a work that would bring them in a lot of ready money during the next few months, would do well to look up the advertisement of B. F. Johnson & Co., Richmond, Va., in another column, as it may be the means of opening up to many new life and large possibilities. These gentlemen have been extensively and successfully engaged in business for many years, and they know what they are talking about when they tell you they can show you how to better your financial condition.

## Bloomer's Boom.

The California papers have been making mention of a find on the Colorado desert of a fine quality of lithographic stone, and now comes the word from Tucson that the find was made by O. B. Bloomer, formerly of Tombstone. The Citizen says that O. B. Bloomer and Jos. Burkett, well known prospectors, have made the discovery of a genuine lithographic stone quarry in the Bad Lands, twenty-five miles southeast of Salton, S. P. R. R. They have located 160 acres each, and reports received from the Smithsonian Institute, Washington, Allen N. Drexler, Los Angeles, Rand, McNally & Co., Chicago, pronounce it "the first and only stone of the kind ever found outside the limits of Bavaria that will take the ink properly."

The altitude of the discovery is 200 feet below the sea level, but the ledges come to the surface. A block 20 feet square by 8 inches thick can be extracted, and so far as explored, indications are good that the discovery embraces several hundred acres. Experts estimate the value of the stone at \$1 a pound, and it is predicted that Bloomer and Burkett have it within their grasp to become millionaires.

## Electric Bitters.

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise.—A purer medicine does not exist and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove pimples, boils, salt rheum and other affections caused by impure blood; will drive malaria from the system and prevent as well as cure all malarial fevers.
